ABSTRACT:

PROBLEM TO BE SOLVED: To display occupancy of game machines on information equipment with a high reliability.

SOLUTION: Such a game machine reservation system 1 is provided with state display devices 4 installed at a lot of respective PACHINKO (Japanese pinball game) stands 5 for displaying their states concerning play and information equipment 3 provided separately from the PACHINKO stands 5. Concerning the game machine reservation system 1 equipped with an information display device 8 for displaying game machine information such as the using states or prize winning conditions of respective PACHINKO stands 5 at the information equipment 3 and a reserving means for reserving any target PACHINKO stand 5, an interruption instructing means is provided for instructing the

indication of
interruption showing the temporary stop of play on the state display
device 4.
Then, the reserving means or the state display device 4 is
constituted to
exclude the PACHINKO stand 5, of which the interruption is displayed
on the
state display device 4, out of the objects of reservation due to the
reserving
means.
